## NN (L) Patrimonial Balanced European Sustainable - P Cap EUR

ISIN: LU1444115874

A sub-fund (hereafter referred to as the fund) of NN (L) Patrimonial

This fund is managed by NN Investment Partners B.V.

### Objectives and Investment Policy

The fund mainly invests in a diversified portfolio of Eurozone fixed income instruments denominated in Euro and European stocks from companies and issuers pursuing policies of sustainable development observing environmental, social and governance principles. To determine our eligible sustainable investment universe, companies are screened using exclusionary screening whereby companies with serious and structural issues concerning controversial behaviour and activities are excluded. Only countries with the best environmental, social and governance scores are eligible to invest in. The fund uses active management to respond to changing market conditions by using amongst others fundamental and behavioural analysis resulting in dynamic asset allocations over time. The fund positioning can therefore materially deviate from the benchmark. The fund is actively managed against an investment profile of 50% bonds denominated in Euro and 50% European stocks. Measured over a period of five years we aim to beat the performance

of the benchmark composed as follows: 50% MSCI Europe Index (Net), 50% Bloomberg Barclays Euro Aggregate. The benchmark is a broad representation of our investment universe. The fund may also include investments into securities that are not part of the benchmark universe. The fund strives to add value via three approaches: (1) Tactical allocation between and within stocks and bonds, (2) Selection of companies and governments which combine respect for environmental principles, social principles (e.g. human rights, non-discrimination, fight against child labor) and governance principles with a financial performance, (3) Decisions aimed at portfolio diversification and risk management. You can sell your participation in this fund on each (working) day on which the value of the units is calculated, which for this fund occurs daily. The fund does not aim to provide you with a dividend. It will reinvest all earnings.

Historical data, such as is used for calculating this indicator, may not be a reliable indication of the future risk profile of this fund. There is no guarantee that the risk indicator will remain unchanged, it may shift over time. The lowest category of risk does not mean that the investment is risk-free.

This fund is in category 4 because of the behaviour of the product during the measuring period. The overall market risk, taking into account past performances and future potential evolution of the markets, associated with financial instruments used to reach the investment objective is considered high. These financial instruments are impacted by various factors. These include, but are not limited to, the development of the financial market, the economic development of issuers who are themselves affected by the general world economic situation and the economic and political conditions in each country. Expected credit risk, the risk of failure of the issuers of the underlying investments is medium. No guarantee is provided as to the recovery of your initial investment.
