(a sub-fund of DPAM CAPITAL B SA, a public SICAV under Belgian law)

managed by Degroof Petercam Asset Management SA

Classe B - ISIN: BE0944426346

Objectives and investment policy

Objective

- The objective of the fund is to offer you, through an actively managed portfolio, exposure to the capital securities of Belgian companies.

Investment policy

- The fund invests principally, without any form of sector restriction in shares and/or other securities giving access to capital of companies with their registered office and/or a significant portion of their assets, activities, profit centres or decision-making centres in Belgium or which form part of the BEL 20 (an index based on the 20 biggest market capitalisations on the Belgian market).

Subscription/Redemption

- Subscription or redemption requests may be made every business day before 3 p.m. (Belgian time) to Banque Degroof Petercam SA.

Types of Units

- The units of the fund are capitalisation units, issued in the form of shares, which do not give right to a dividend. All income earned by the fund is reinvested.

Derivatives

- The fund may, on an optional basis, use derivatives such as options and/or futures contracts ("futures" and/or "forwards") in order to achieve the investment objectives and/or for hedging purposes (hedging or exposure of/to interest rate and credit risks).

Investment holding period

- This fund may not be appropriate for investors who intend to withdraw their capital within 5 years of the initial investment.

Risk and reward profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- All investments being risky by nature, the return (performance) is subject to a high degree of uncertainty. The risk and reward profile of your investment is reflected by a synthetic indicator which ranks the fund over a risk/return scale from the lowest (1) to the highest (7) risk category.
- The computation of this risk/reward profile is based on the portfolio's net asset value fluctuations (volatility) recorded over the past 5 years (or on simulations based on an appropriate benchmark for funds or share classes of less than 5 years). It gives an indication of the fund's potential performance and of your capital risk exposure, but it does not guarantee that the risk/reward profile currently published will remain unchanged.
- Historical data, such as those used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the fund.
- The lowest risk/return category (level 1) does not mean a risk-free investment.
- The risk/return profile mentioned herein is essentially due to the presence of equities in the portfolio.
- The capital invested in this fund is neither guaranteed nor protected. You may therefore lose all or part of your investment.

Certain risks are not (or not adequately) reflected in the risk and reward profile mentioned herein. Amongst those risks, the following could have a material impact on the risk and reward profile of the fund:

- Liquidity risk: risk that a position cannot be closed at the right time at a reasonable price.
- Concentration risk: this risk is associated with the fact that the number of companies may be less than forty and that investments are in a single country: there is no international diversification.
