

## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### Invesco PRC Equity Fund (the "Fund")

#### A sub-fund of Invesco Funds Series 5 (the "Umbrella Fund")

#### Class A (EUR hedged) accumulation - EUR (ISIN: IE00B29WLS52) (the "Share Class")

The Fund is managed by Invesco Global Asset Management DAC, part of the Invesco Group.

### Objectives and Investment Policy

- The objective of the Fund is to achieve long-term capital growth.
- The Fund invests primarily in shares of companies in the People's Republic of China (PRC).
- The PRC refers to Hong Kong SAR, Mainland China and Macau SAR.
- The Fund is actively managed within its objectives and is not constrained by a benchmark.
- You can buy and sell shares in the Fund on any Business Day in Ireland (as defined in the Prospectus).
- Any income from your investment will be reinvested.

### Risk and Reward Profile

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

### Other Risks

- The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- Shares of companies are generally considered high risk investments and may result in fluctuations in the value of the Fund due to external factors.
- As a large portion of the Fund is invested in a less developed country, you should be prepared to accept significantly large fluctuations in the value of the Fund.
- The Fund may use derivatives (complex instruments) in an attempt to reduce the overall risk of its investments or reduce the costs of investing, although this may not be achieved.
- This Share Class is denominated in a different currency than that of the base currency of the Fund and may be hedged to mitigate against the effect of exchange rate fluctuations between the two currencies. However, this may not be achieved.
- As this Fund is invested in a particular geographical region, you should be prepared to accept greater fluctuations in the value of the Fund than for a fund with a broader geographical investment mandate.
- The Fund invests in a limited number of holdings and is less diversified. This may result in large fluctuations in the value of the Fund.
- Return on your investment may be adversely affected by variations in exchange rates.
- It may be difficult for the Fund to buy or sell certain instruments in stressed market conditions. Consequently the price obtained when selling such instruments may be lower than under normal market conditions.
- A more detailed description of risk factors that apply to this Fund is set out in Section 8 of the Prospectus.
