The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Robeco QI Global Conservative Equities D EUR (LU0705782398)

This fund is a subfund of Robeco Capital Growth Funds, SICAV

Management Company: Robeco Luxembourg S.A.

Objectives and investment policy

Robeco QI Global Conservative Equities invests in low-volatility stocks in developed and emerging countries across the world. The selection of these stocks is based on a quantitative model. The fund's long-term aim is to achieve returns equal to, or greater than, those on global equity markets with lower expected downside risk. The selected low-risk stocks are characterized by high dividend yields, attractive valuation, strong momentum and positive analyst revisions as well. This results in a diversified, low turnover portfolio of defensive stocks aiming to achieve stable equity returns and high income.

Currency risk will not be hedged. Exchange-rate fluctuations will therefore directly affect the

fund's share price.

The fund is not constrained by a benchmark.

This share class of the fund does not distribute dividend.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

Equities in general are more volatile than bonds. This fund has a lower volatility compared to other equity funds as it is specifically focusing on low-volatile shares.

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

- The product invests or may invest in China A-shares. Investing in China A-shares carries increased risk, most notably liquidity, regulatory, quota, custody and broker risks.
