

KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of this fund. You are advised to read it so you can make an informed decision about whether to invest.

MAINFIRST - TOP EUROPEAN IDEAS FUND (A)

MainFirst - Top European Ideas Fund is a sub fund of MainFirst SICAV.
MainFirst Affiliated Fund Managers S.A. is the Management Company of the Fund.
ISIN LU0308864023

OBJECTIVES AND INVESTMENT POLICY

The investment objective of the sub-fund to which unit class A belongs is to outperform the STOXX EUROPE 600 (Net Return) EUR (performance index). While the investment focus is on European companies, these investments in equities and other equity securities are made worldwide. In so doing, depending on the circumstances, the investment focus may be on large caps or small and mid caps. Furthermore, at least 75% of the sub-fund's assets (excluding cash and cash equivalents) will be invested in equities and other equity securities of companies that are headquartered in a member country of the European Union, or which perform the bulk of their business activities in a member country of the European Union, or which operate as holding companies invested mainly in the equity interests of companies headquartered in a member country of

the European Union. In addition, up to 25% of the sub-fund's assets may be invested in: equities of companies from around the world that do not meet the conditions in the above paragraph, as well as in bonds, convertibles and warrant-linked bonds (with options on securities) issued by companies from around the world, provided these are denominated in a freely convertible currency. Irrespective of the targeted risk distribution, the sub-fund may temporarily be subject to investment concentration in terms of country or sector allocation. Income of the sub-fund's unit class A is reinvested, rather than being paid out. Shares of the sub-fund's unit class A can be redeemed on a daily basis.

RISK AND REWARD PROFILE

The data used to calculate the synthetic indicator is based on the historical performance of unit class A and cannot be used as a basis for the future risk and reward profile of this class. The sub-fund is primarily subject to the price volatility of stock markets in Europe. Unit class A has been assigned to the aforementioned risk and reward category, because its value may vary due to the investment policy described above. The factors underlying the risk and reward classification may be subject to change, resulting in the A unit class being assigned to a new category. Even the lo-

west risk and reward category does not correspond to a risk-free investment. A detailed description of risks can be found in the "Risk profile" section of the respective sub-fund annex to the prospectus. The sub-fund invests its assets in corporate shares and bonds. Should the issuing company become insolvent, its shares and/or bonds may lose some or even all of their value. Investments in the stocks of smaller, less well-known companies are associated with greater risks and the potential for greater price volatility than investments in larger companies.
