KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVES AND INVESTMENT POLICY

Investment objective: The objective is to grow the value of its assets in the medium term (3 to 5 years). The assets of the Sub-Fund are predominantly, but not exclusively, invested in convertible or exchangeable bonds with underlying assets in the eurozone. The Sub-Fund seeks to optimise the risk/return ratio over the specified period by diversifying its sources of return – underlying assets, sector, coupon, issuer, interest rate and currency – based on a systematic analysis of the various exposures.

Benchmark index: none

Investment policy: The Sub-Fund will actively manage bonds which are convertible and exchangeable into eurozone securities. The Sub-Fund invests at least 60% of its net assets in these securities. For contingency purposes, bonds convertible to equities outside the eurozone may also be used.

Capitalisation of underlying assets is not a factor in the selection, but the size of the issue counts, and a low weighting will be given to issues of less than EUR200 million.

The investment process combines a global bond strategy with stock selection (stock-picking). As part of this strategy, the Investment Manager's selection of convertible bonds is such that at least 70% of the Sub-Fund's net assets will comprise investment grade or equivalent issues.

The Sub-Fund may invest up to 10% of its net assets in synthetic convertible bonds, warrants and other bonds with equity-type characteristics of any kind.

The Sub-Fund may hold equities arising from a conversion for a three-month period. The corresponding percentage shall comprise less than 10% of the net assets in any event.

The securities held in the portfolio may be denominated in a currency other than the euro up to 35% of the net assets. However, the currency risk will not exceed 20% of the net assets.

For effective portfolio management purposes and without diverting from its investment objectives, the Sub-Fund may enter into reverse repurchase agreements covering eligible Transferable Securities or Money Market Instruments, subject to a limit of 10% of its net assets.

For cash management purposes, the Sub-Fund may use debt securities or bonds denominated in euro, up to the limit of 25% of the net assets. Such instruments, with a residual maturity of less than three months and without restriction in terms of allocation between public and private debt, will be issued by sovereign states, assimilated institutions, or even by entities with a short-term rating higher than or equal to A2 according to Standard & Poor's, or an equivalent rating assigned by another independent agency, or a deemed equivalent internal rating delivered by the Investment Manager for non-rated securities.

The Sub-Fund may invest up to 100% of its assets in OTC Derivatives or financial contracts traded on a Regulated Market or Other Regulated Market.

Moreover, up to the limit of 10% of the net assets, the Sub-Fund may invest in units or shares of fixed income or diversified UCITS or other eligible Investment Funds, including those specialising in convertible bonds and/or exchange-traded funds (ETF).

The maximum proportion of assets that may on average be subject to SFT (repurchase transactions only) will not exceed 10% of the net assets of the Sub-Fund. It is expected that the use of repurchase transactions will generally not exceed 10% of the net assets of the Sub-Fund.

Recommended holding period of more than 2 years

Frequency of share buying or selling: Every Luxembourg and France bank business day except for Good Friday, 24 December (Christmas Eve) and the days on which the French markets are closed (official calendar of Euronext Paris S.A.) for orders received by the transfer agent on each NAV calculation day before 12:30 p.m. and processed on the basis of that day's net asset value.

Income allocation: Accumulation

RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The definition of the risk and reward category is based on the historical performance data and/or the risk limit indicated in the Sub-Fund's investment policy.

It may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown may change over time. Category 1 does not mean that an investment is risk-free.

This Sub-Fund is rated in category 4, in line with the type of securities and geographic regions detailed under the heading "Objectives and investment policy", as well as the currency of the unit.

Significant risks not taken into account in this indicator:

Credit Risk: When a significant level of investment is made in debt securities.

Liquidity Risk: The markets for some securities and instruments may have limited liquidity. This limited liquidity could be a disadvantage to the Sub-Fund, both in the realisation of the prices quoted and in the execution of orders at desired prices.

Impact of techniques such as derivative contracts: The use of derivatives instruments can infer a decrease of the asset more significant than the decrease of the invested underlying assets or markets.

Counterparty risk: where a fund is backed by collateral or has significant investment exposure through contracts with a third party.

Operational risk: The Sub-Fund may suffer losses due to the failure of operational processes, including those related to the safekeeping of assets.

The occurrence of any of these risks may negatively impact the net asset value.
