

## Key Investor Information

This document provides you with key investor information about this sub-fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this sub-fund. You are advised to read it so you can make an informed decision about whether to invest.

# Carmignac Portfolio Capital Plus

Unit A EUR Acc (ISIN: LU0336084032)  
a sub-fund of the Carmignac Portfolio SICAV

**Carmignac Gestion Luxembourg is the management company of this UCITS.  
(Carmignac Group)**

## Objectives and investment policy

The key features of the sub-fund are as follows:

- The sub-fund aims to outperform its reference indicator on an annual basis. The sub-fund seeks to maintain annual ex-ante volatility of less than 2.5%.
- The reference indicator is the capitalised EONIA. This index is the main money market benchmark for the eurozone and is the average of the overnight interbank rates published by the European Central Bank. The index represents the risk-free rate in the eurozone.
- The typology of the different strategies used by the sub-fund is divided as follows:
  - Arbitrage strategies: the portfolio shall be constructed by using financial instruments to take long and/or short positions on fixed income, currency and commodity index markets (forward instruments or otherwise) as well as on the volatility of these products, and
  - Investment strategies: the sub-fund invests mainly in international bonds, debt securities and money market instruments, in particular bonds issued or guaranteed by a State (without any restrictions in terms of region).
- The manager may use Relative Value strategies as performance drivers, looking to take advantage of the relative value between different instruments. Short positions may also be taken through derivatives.
- The geographical investment universe of the sub-fund is global, including emerging countries.

## Risk and reward profile

Lower risk

Higher risk

Potentially lower return

Potentially higher return

This indicator represents the annual historical volatility of the sub-fund over a 5-year period. Its aim is to help investors understand the uncertainty attached to gains and losses that may have an impact on their investment.

- Historical data used to calculate this indicator may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category of this sub-fund is not guaranteed and may change over time.
- Category 1 does not mean the investment is risk-free.
- This sub-fund is placed in category 2 owing to its exposure to interest rate and credit risks.
- The sub-fund's capital is not guaranteed.

Other information:

- The sub-fund uses derivatives for hedging or arbitrage purposes, or to expose the portfolio to the following risks (directly or via indices): currencies, bonds, equities (all capitalisations, not exceeding 10% of the net assets), ETFs, dividends, volatility, variance (the latter two categories for up to 10% of net assets) and commodities. The derivatives available are options (vanilla, barrier, binary), futures and forwards, swaps (including performance) and CFDs (contracts for difference) on one or more underlyings. Overall exposure to derivatives is controlled by the expected leverage, calculated as the sum of nominal amounts without netting or hedging, of 500%; this may be higher under certain conditions. Gearing remains at 2.
- Up to 10 % of the net assets may be invested in contingent convertible bonds ("CoCos"). CoCos are regulated subordinated debt instruments that are complex, but consistent in nature. Please refer to the prospectus for more information.
- The sub-fund may invest up to 10% of its net assets in units or shares of investment funds.
- This sub-fund may not be suitable for investors planning to withdraw their investment within two years.
- Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 18:00 CET/CEST and are executed on the next business day using the previous day's NAV.
- This unit is an accumulation unit.

Risks to which the sub-fund may be exposed and which could lead to a fall in the net asset value to which the indicator gives too little consideration:

- Credit risk: the sub-fund is invested in securities whose credit rating may decline, meaning there is a risk that the issuer may not be able to meet its commitments. Should an issuer's creditworthiness decline, the value of the bonds or derivatives linked to this issuer may fall.
- Counterparty risk: the sub-fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC.
- Risks associated with China: investing in this sub-fund entails risks associated with China, especially risks associated the use of Stock Connect (a system facilitating equity investment in the A shares market via a Hong Kong-based entity acting as the sub-fund's nominee). Investors are advised to familiarise themselves with the specific risks of this system, as well as with other risks linked to investments in China (CIBM, RQFII status...) as outlined in the prospectus.
- For more information on risks, please refer to the prospectus of the sub-fund.

## Charges

The charges paid are used to cover the costs of running the sub-fund, including the costs of marketing and distributing units. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
<b>Entry charge</b>	1.00%
<b>Exit charge</b>	0.00%
<b>Conversion fees</b>	1.00%
This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
<b>Ongoing charges</b>	1.20%
Charges taken from the fund under certain specific conditions	
<b>Performance fee</b>	
10.00% of the outperformance if the performance is positive and exceeds that of the reference indicator (EONIA capitalised) since the beginning of the year. Performance fee invoiced for the last financial year: 0.29%	

Entry, exit and conversion charges shown are the maximum applicable and are paid to the distributor. Lower fees may apply in some cases; contact your financial advisor or distributor to find out the actual amount.

**Ongoing charges** are based on the expenses for the last financial year ended 31 December 2017. They may vary from year to year and do not include performance fees or transaction costs (except in the case of entry/exit charges paid by the sub-fund when buying or selling units of another collective investment vehicle).

For more information on fees, charges and performance fee calculation methods, please refer to the "Fees and expenses" section of the prospectus, available on the website: [www.carmignac.com](http://www.carmignac.com)

## Past performance

■ Performance of the sub-fund  
 ■ Performance of reference indicator: EONIA capitalised

- Past performance is not a reliable indication of future results.
- Charges are included in the performances shown.
- This unit was created in 2007.
- Performances shown are calculated in EUR.
- The sub-fund investment policy is not benchmarked, the index provided is a reference indicator.
