AXA World Funds - Optimal Income

A Sub-Fund of AXA World Funds SICAV

Share class: AXA World Funds - Optimal Income A Capitalisation EUR (ISIN: LU0179866438)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

Share Class A Capitalisation EUR (LU0179866438) is representative for Share Class A Distribution EUR (LU0179866354).

Objective and Investment Policy

Investment Objective

The Sub-Fund seeks to achieve a mix of stable income and capital growth measured in Euro by investing in a mix of European equities and fixed income securities, over a long term period.

Investment Policy

The Sub-Fund is actively and discretionarily managed in order to capture opportunities in the European equity and security markets. Investment decisions are based on a combination of macroeconomic, sector and company specific analysis. The securities selection process is mainly based on a rigorous analysis of the companies' business model, quality of management, growth prospects and overall risk return profile. The Fixed Income allocation is managed in order to mitigate the volatility of equity returns.

The Sub-Fund invests a set of equities (including high dividend equities) and fixed income securities issued by governments and companies domiciled or listed in any country of Europe. The Sub-Fund invests up to 10% of its assets in securities issued by governments and companies based in non-European countries.

The investment policy may be achieved by direct investments and through derivatives, especially by entering for instance into total return swaps on equities, indices or bonds and credit derivatives swaps on bonds.

The Sub-Fund's global exposure will be monitored by using the absolute Value-at-Risk (VaR) measurement with a maximum VaR of 5.25% with a five (5) Business Days horizon and 95% confidence level which corresponds to a VaR of 14.85% with a twenty (20) Business Days horizon and 99% confidence level under VaR normal distribution assumptions. This means that there is a probability of

5% that a loss experienced by the Sub-Fund within the five (5) Business Days horizon may be higher than 5.25% of the Sub-Fund's Net Asset Value, under normal market conditions. The Investment Manager expects that the level of leverage of the Sub-Fund based on the sum of the notional approach will be between 0 and 2. However, the attention of any investor in the Sub-Fund is drawn to the fact that the effective level of leverage of the Sub-Fund may be higher than the expected level of leverage set forth above from time to time due to market conditions.

Derivatives may also be used for hedging purposes.

Income

For Capitalisation share classes (Cap), the dividend is reinvested. For Distribution share classes (Dis), the dividend is distributed.

Sub-Fund Currency

The reference currency of the Sub-Fund is EUR.

Investment Horizon

This Sub-Fund may not be suitable for investors who plan to withdraw their contribution within 6 years.

Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Sub-Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

Why is this Sub-Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which are subject to some levels of variation, which may result in gains or losses.

Additional Risks

Credit Risk: risk that issuers of debt securities held in the Sub-Fund may default on their obligations or have their credit rating downgraded, resulting in a decrease in the Net Asset Value.

Counterparty Risk: risk of bankruptcy, insolvency, or payment or delivery failure of any of the Sub-Fund's counterparties, leading to a payment or delivery default.

Impact of any techniques such as derivatives: certain management strategies involve specific risks, such as liquidity risk, credit risk, counterparty risk, legal risk, valuation risk, operational risk and risks related to the underlying assets.

The use of such strategies may also involve leverage, which may increase the effect of market movements on the Sub-Fund and may result in significant risk of losses.

Risk linked to investments in hedge funds: a limited part of the assets of the concerned Sub-Fund (maximum 10%) is exposed to funds pursuing alternative strategies. Investments in alternative funds imply certain specific risks linked, for example, to the valuation of the assets of such funds and to their poor liquidity.
