Pictet - Short-Term Money Market CHF

(the "Compartment") is a compartment of Pictet (the "Fund")

R (the "Share class") - ISIN LU0128499588

This Fund is managed by Pictet Asset Management (Europe) S.A. (the "Management Company"), part of the Pictet group

Objectives and Investment Policy

- The Compartment's objective is to offer investors a high degree of protection of their capital denominated in CHF and to provide a return in line with money market rates by investing its assets in money market instruments that meet the criteria for money market instruments defined in Directive 2009/65/EC or in deposits. It will limit its investments in securities with a residual maturity until the legal redemption date of less than or equal to 397 days.
- The eligible financial instruments are mainly bonds, floating rate notes, money market instruments and, to a lesser extent, derivatives. Investments will be made in securities of issuers with a rating of at least A2 and/or P2.
- The Compartment may use financial derivative instruments subject to the limits set in the ESMA recommendations (Ref. CESR/10-049). The Compartment may also invest in structured products.
- The Compartment is actively managed by allocating its wealth to different fixed income instruments, within a strict risk control environment.
- The reference currency of the Compartment is CHF.
- The reference currency is not necessarily identical to the compartment's investment currencies.
- Investments not denominated in CHF will be systematically hedged in order to avoid exposure to a currency other than the CHF.
- This Share class does not distribute dividends.
- The price of the Share class is calculated on a daily basis. Investors may redeem shares of the Compartment on any business day in Luxembourg unless no underlying price is available (market closed).
- The price of the Share class may be adjusted to ensure that the costs caused by subscriptions or redemptions are borne by the investors responsible for those flows.
- Recommendation: this Compartment may not be appropriate for investors who plan to withdraw their money within 6 months.

Risk and Reward Profile

- The Share class is assigned to this risk category because of the price variations resulting from its currency and the nature of the Compartment's investments and strategy.

- The Compartment offers no capital guarantee or asset protection measures.
- The Compartment may be exposed to the following material risks which are not adequately captured by the synthetic risk indicator and may negatively impact its performance:
 - Operational risk: losses may result from, for instance, human errors, system failures, incorrect valuation and safekeeping of assets.
 - Counterparty risk: losses may occur when a counterparty does not honour its obligations related to instruments or contracts such as over-the-counter derivatives.
 - Impact of financial techniques: the use of leverage may amplify losses and gains, and/or may not result in the intended exposure.
 - Credit risk: sudden losses may occur when issuers of debt securities default on their payment obligations.
