

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

DNCA Invest - Alpha Bonds - Class A - EUR

A sub-fund of the SICAV DNCA INVEST - ISIN: LU1694789451

This fund is managed by DNCA FINANCE Luxembourg

Objectives and Investment Policy

Essential management characteristics:

Absolute return bond Fund

The Sub-Fund seeks to provide, throughout the recommended investment period of more than three years, a higher performance, net of any fees, than the EONIA index plus 2.5%. This performance objective is sought by associating it to a lower annual volatility than 5% in normal market conditions. Investors' attention is drawn to the fact that the management style is discretionary.

The investment process is made of the combination of strategies including:

- a short/long directional strategy aiming to optimise the performance of the portfolio based on interest rate and inflation expectations;
- an interest rate curve strategy aiming to exploit the variations of the spreads between long-term rates and short-term rates;
- an arbitrage strategy aimed at seeking the relative value on various bond asset classes;
- a credit strategy founded on the usage of bonds issued by the private sector.

The modified duration of the Sub-Fund will stay between -3 and +7, without any restriction on the modified duration of individual securities in the Sub-Fund.

The Sub-Fund will at all times invest at least 75% of its total assets in bonds in any currency from OECD issuers, having a rating of at least B by S&P (or being considered as equivalent by the Investment Manager) at the time of purchase. Fixed Income securities which may be downgraded during their lifetime under B grade may not exceed 10% of its total assets.

The Sub-Fund mainly invests in fixed rate, floating rate or inflation-indexed debt securities and negotiable debt within the following limits:

- Convertible or exchangeable bonds : up to 100% of its total assets,
- Contingent convertible bonds (Coco Bonds) : at most 20% of its total assets,
- Equities (through exposure from convertible bonds, synthetic convertibles bonds or options on future equity market): up to 10% of the Sub-Fund's asset may be exposed to the stock market.

The Sub-Fund may invest up to 10% of its net assets in units and/or shares of UCITS and/or AIFs.

The Sub-Fund will use all types of eligible derivatives instruments traded on regulated or OTC markets when these contracts are better suited to the management objective or offer lower trading costs. These instruments may include, but are not restricted to: futures, options, swaps, CDS on indices, CDS.

The Sub-fund may invest in securities denominated in any currency. The non-base currency exposure may be hedged back to the the base currency to moderate the currency exchange risks which will not represent more than 20% of the total assets of the Sub-Fund.

The Sub-Fund may also use efficient management techniques such as temporary repurchase transactions, reverse repurchase transactions and securities lending.

Investment zone : Mainly OECD

Other important information:

Income is accumulated

The redemption of units/shares may be requested each day.

Recommended investment period:

This sub-fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and Reward Profile

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The historical data used to calculate the synthetic indicator may not be a reliable indication of the future risk profile of the UCITS. The risk category associated with this sub-fund is not guaranteed and may change over time. The weakest category does not mean no risk. The risk level of this UCITS is due to exposure to fixed income markets. The fund does not benefit from any capital protection or guarantee.

Material risks not taken into account in this indicator:

Credit risk: in the event that an issuer is downgraded, the value of the bonds in the portfolio may fall, thus decreasing the sub-fund's net asset value.

Counterparty risk: the use of OTC derivatives may expose the investor to the risk of default by the counterparty.

Risk of using derivative products: the use of derivative instruments may reduce the net asset value in case of exposure in a direction opposite to that of the market trend.

The occurrence of one of these risks may lead to a reduction in the net asset value.

Charges

The charges paid serve to cover the operating costs of the UCITS, including those of marketing and distributing the shares or units. These costs reduce the potential growth of the investments.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	0.00%

The percentage indicated is the maximum that may be taken out of your capital before it is invested. In certain cases the investor pays less. You can obtain the actual amount of entry and exit charges from your financial advisor or the establishment with which you place your order.

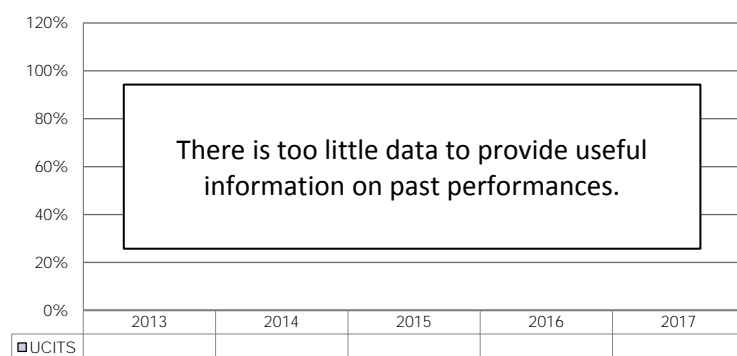

Charges taken from the fund over a year	
Ongoing charges	1.40%

Ongoing charges are based on a maximum percentage of management fees as set out in the Prospectus. The percentage shown is a forecast of charges for the financial year ending 31 December 2018. This percentage may vary from one financial year to another. They do not include: performance fees and transaction charges except in the case of subscription and/or redemption charges paid by the UCITS when it buys or sells units in another investment vehicle.

Charges taken from the fund under certain specific conditions	
Performance fee	0.00% 20% of the positive performance net of any fees above EONIA Index +2.5% with High Water Mark.

For further information on the charges, please see page 62 of the latest version of the prospectus available on the website www.dnca-investments.com.

Past Performance

All charges are included in the performance calculations.

The unit/share described in this document was launched in December 2017.

The currency in which the performances are indicated is as follows: EUR.

Past performance is not an indication of future results.

The performance of the other share classes is available on the Management Company's website.
