## Capital Group Global Allocation Fund (LUX)

This fund is a sub-fund of Capital International Fund (CIF). This fund is managed by Capital International Management Company Sàrl, part of Capital Group.

Class  
ISIN

B EUR  
LU1006075656

### Objectives and investment policy

The fund seeks the balanced accomplishment of three objectives: long term growth of capital, conservation of principal and current income by investing in equities and bonds as well as other fixed income securities from around the world.

#### Essential features

The fund invests primarily in listed equities and investment grade bonds of companies and governments and other fixed income securities that are admitted to an official listing or traded on other regulated markets. The fund does not use short-selling or leverage.

Investors can buy and sell shares of the fund on a daily basis. This fund may only be appropriate for long-term investment.

#### Dividends

The shares in this class are accumulating and no dividends are distributed.

### Risk and reward profile

Historical data, such as is used in calculating this indicator, may not be a reliable indication for the future. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

The fund is rated 4 due to the nature of its investments which include the risks listed below. These factors singularly or in combination may impact the value of the fund's investments or expose the fund to losses.

- **Equities risk:** The prices of equity securities may decline in response to certain events, including those directly involving the companies whose securities are owned by the fund, overall market changes, local, regional or global political, social or economic instability and currency fluctuations.
- **Bonds risk:** The market values of bonds generally vary inversely with the level of interest rates - when interest rates rise, their values will tend to decline and vice versa. Funds investing in bonds will be exposed to credit risk. Securities which have a lower credit rating are generally considered to have a higher credit risk and

a greater possibility of default than more highly rated securities.

- **Liquidity risk:** Some securities, primarily unlisted securities and/or those traded in OTC markets, under certain circumstances may not be traded quickly enough in the market to prevent a loss.
- **Operational risk:** This fund may invest in markets where settlement systems are less well organised than those of developed markets. Thus settlement may be delayed and cash or securities belonging to the fund may be in jeopardy.
- **Counterparty risk:** Other financial institutions provide services to the fund such as safekeeping of assets or may serve as a counterparty to financial contracts such as derivatives. There is a risk the counterparty will not meet their obligations.
- **Derivative instruments risk:** While the fund intends to use derivative instruments in a

prudent manner and primarily for hedging and/or efficient portfolio management purposes, derivative instruments may expose a fund to additional risks related to the credit risks of the counterparty and potential for increased volatility and reduced liquidity in comparison to the underlying security positions.

- **Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect risk:** Investments in securities traded and cleared on these two programs are subject to various risks associated with the legal and technical framework of Stock Connect and/or may involve clearing and settlement, regulatory and counterparty risks.
- **China Interbank Bond Market risk:** Investments in Chinese onshore bonds traded directly via the China Interbank Bond Market are subject to various risks associated with clearing and settlement, liquidity, regulatory and counterparty risks.

## Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser or distributor about this.

The ongoing charges are based on expenses for the last 12 months. This figure may vary from year to year. It excludes portfolio transaction costs which do affect returns.

**For more information about charges, including potential capping of expenses, please see the 'Expenses' section in the prospectus and the latest annual or semi-annual reports, available at [capitalgroup.com/international](http://capitalgroup.com/international).**
