

## KEY INVESTOR INFORMATION DOCUMENT

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of this fund. You are advised to read it so you can make an informed decision about whether to invest.

## MAINFIRST - GLOBAL EQUITIES UNCONSTRAINED FUND (A)

MainFirst - Global Equities Unconstrained Fund is a sub fund of MainFirst SICAV.  
MainFirst Affiliated Fund Managers S.A. is the Management Company of the Fund.  
ISIN LU1856130205

### OBJECTIVES AND INVESTMENT POLICY

The investment objective of the sub-fund to which unit class A belongs is to outperform the MSCI World Net Total Return EUR Index (the "Benchmark Index"). We invest in equities and other equity securities worldwide. In so doing, depending on the circumstances, the investment focus may be on large caps or small and mid caps. In addition, up to 25% of the sub-fund's assets may be invested in: Bonds, convertibles and warrant-linked bonds (with options on securities) issued by companies from around the world, provided these are denominated in a freely convertible currency. Irrespective of the targeted risk distribution, the sub-fund may temporarily be subject

to investment concentration in terms of country or sector allocation. The sub-fund may hold a higher allocation of liquid assets on a temporary basis. The sub-fund does not acquire units or shares in any fund, irrespective of its legal form. Furthermore, the sub-fund may not hedge against equity risks. Income of the sub-fund's unit class A is reinvested, rather than being paid out. Shares of the sub-fund's unit class A can be redeemed on a daily basis. An active investment approach is pursued.

### RISK AND REWARD PROFILE

The data used to calculate the synthetic indicator is based on the historical performance of unit class A and cannot be used as a basis for the future risk and reward profile of this unit class. The sub-fund is primarily subject to the price volatility of the global stock markets. Unit class A has been assigned to the aforementioned risk and reward category, because its value may vary due to the investment policy described above. The factors underlying the risk and reward classification may be subject to change, resulting in the A unit class being assigned to a new category. Even the lowest risk and reward category does not correspond to a risk-free investment. A detailed description of risks can be found in the "Risk profile" section of the respective sub-fund annex to the prospectus. The following risks have no direct influence on this classification, but may nevertheless be of significance: Investments in the stocks of smaller and less well-known companies are associated with greater risks and the potential for greater price volatility than investments in larger, more mature and better-known companies. Investments outside the eurozone are subject to currency risk.
