Objectives and Investment Policy

Essential management characteristics:

The fund aims to outperform the 20% DJ EUROSTOXX 50 + 80% FTSE MTS Global composite index calculated with dividends reinvested, over the recommended investment period.

This multi-asset fund seeks to improve the return on a wealth investment through an active equity and bond management in the Euro zone.

Up to 100% of its total net assets may be exposed to fixed income securities denominated in Euro, composed of securities issued by public or private sector-issuers, without any rating constraint including non-rated issues of which at least 50% is composed of debt securities belonging to the "Investment Grade" category (i.e. which have an equal or greater Standard & Poor's A-3 short-term rating or BBB- long-term rating for example or any rating judged equivalent by the Management Company).

The fund may invest up to 35% of its net assets in equities from issuers belonging to all market capitalization categories, headquartered in OECD countries and denominated in Euro of which investments in equities issued by issuers having a capitalization under 1 billion Euros may not exceed 5% of the fund's net assets.

The duration of the portfolio will be limited to 7 years.

Investments in UCITS or FIA will be limited to 10% of the fund's net assets.

In order to achieve the investment objective, the fund may make use of securities which embed derivatives. (examples: convertibles bonds, warrants). The fund may not invest in financial derivative instruments.

The fund may only invest directly in Euro denominated securities. However, the fund can be exposed marginally to exchange rate risk within the context of an investment in UCI's units and/or share classes holding securities denominated in a currency and/or securities issued from corporate actions which are denominated in any currency other than Euro. Within the context of an investment in UCI's units and/or share classes holding non-OECD securities, the fund may be exposed marginally to a non-OECD country risk.

The fund may make use of deposits and borrowings.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The historical data used to calculate the synthetic indicator may not be a reliable indication of the future risk profile of the UCITS. The risk category associated with this sub-fund is not guaranteed and may change over time. The weakest category does not mean no risk. The risk level of this UCITS is due to exposure to equity and/or fixed income markets. The fund does not benefit from any capital protection or guarantee.

Material risks not taken into account in this indicator:

Credit risk: in the event that a deterioration in issuer quality, the value of the bonds in the portfolio may fall, thus decreasing the fund's net asset value.

Liquidity risk: on certain markets and in given market situations, the manager may find it difficult to sell certain financial assets.

The occurrence of one of these risks may lead to a reduction in the net asset value.
